

# VARIO xray

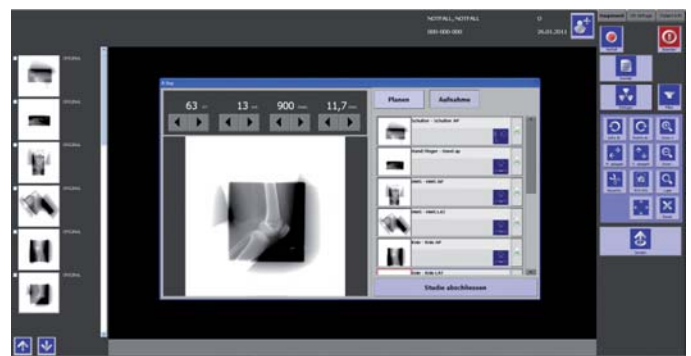

## Image Acquisition Software

### "State of the Art" Image Acquisition Software for DR Flatpanel systems

VARIO xray is a professional image acquisition software for xray images generated by the DR-Factory flatpanel systems.

The innovative image processing software, which can easily be adjusted to user specific requirements, impresses with an extraordinary image quality - in human as well as veterinary radiology.

High-performance image processing filters allow for organ-specific optimization and therefore provide excellent results regarding image quality.
